Why GS Exterior Experts

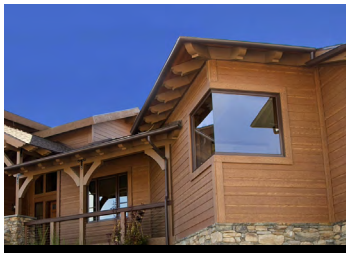
Colorado's trusted Exterior Remodeling Partner

Since 1999, GS Exterior Experts has been a family-owned Colorado company delivering the Gold Standard in exterior remodeling. Serving homeowners across Colorado, we transform homes with expert craftsmanship, premium materials, and exterior systems built to withstand Colorado's demanding climate.

Family-Owned Since 1999 | **Certified Installation Experts** | **Lifetime Workmanship Warranty**

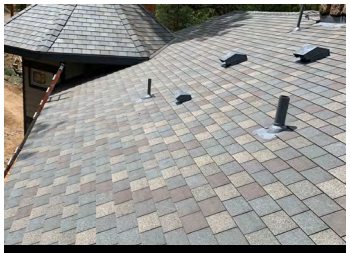
Our Services

We offer a comprehensive suite of services tailored to Colorado's unique climate and aesthetic needs.



Siding

Durable, weather-resistant siding solutions including fiber cement, vinyl, woodtone, board-and-batten, stucco, stone veneer, and more.

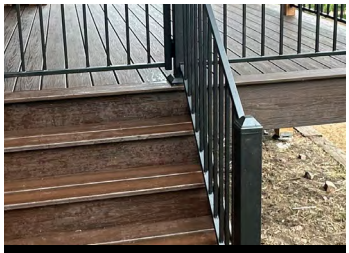


Roofing

Impact-resistant and metal roofing systems engineered to withstand extreme hail and weather conditions.

Windows

Energy-efficient replacement windows, including vinyl, fiberglass, aluminum, and specialty configurations from trusted brands.



Decks

Beautiful, long-lasting composite and wood decks, expertly crafted using TimberTech and Trex products.

Awards & Recognition

5 Time James Hardie President's Club Award Winner

GS Exterior Experts is proud to be recognized as a five-time recipient of the prestigious James Hardie President's Club Award, an honor awarded to less than 1% of contractors nationwide for outstanding craftsmanship, installation excellence, and customer satisfaction.

This recognition reflects our commitment to delivering the Gold Standard in exterior remodeling for homeowners across Colorado.

- Home Advisor, Top Rated Award Winner

Transform Your Home with Colorado's Most Trusted Siding Experts

Whether you're updating for style, energy efficiency, or durability, GS Exterior Experts brings unmatched siding expertise to every project. As a family-owned company serving Colorado since 1999, we've built our reputation on honesty, integrity, and expert craftsmanship. From consultation to installation, our team ensures your home's siding not only looks beautiful but also stands up to Colorado's toughest weather.

The Gold Standard in Siding

Why Homeowners Choose GS Exterior Experts

Family-Owned & Operated Since 1999
You'll work with a locally rooted team that treats your home like their own.

James Hardie® Elite Preferred Contractor
Top-tier credentials that ensure expert installation and product warranty compliance.

Dedicated Project Managers
From estimate to final walkthrough, you'll have a single point of contact-no handoffs, no confusion.

Lifetime Workmanship Warranty
We stand behind our work long after the project is complete.

Our Proven Process

01 Start with an easy, no-obligation estimate.

02 Explore product options that prioritize your needs and budget with our design tools.

03 Our professional and friendly crew transforms your home.

Fiber Cement

Engineered for Colorado's extreme climate, James Hardie® fiber cement siding is non-combustible and highly resistant to hail, moisture, and pests, making it one of the most durable exterior options available. It delivers the authentic look of woodgrain with a curated palette of baked-on colors designed to resist fading.

For homeowners seeking a rustic mountain aesthetic with maximum fire resistance, we also install EverLog® concrete log siding and log home systems. Built from reinforced concrete, EverLog provides the timeless appearance of real log construction while offering exceptional durability, minimal maintenance, and superior resistance to fire, insects, and weather.

As Colorado's Elite Preferred James Hardie installer and an experienced EverLog installation partner, GS Exterior Experts delivers precision craftsmanship backed by industry-leading warranties.

Durability

add in 15 Year Paint finish warranty – 30+ years. Non-combustible. Resists fire, hail, pests, and extreme climates.15 Year Paint finish warranty.

Maintenance

Low. Occasional rinsing; baked-on color resists fade.

Aesthetics & Style

Clean lines with real woodgrain look; curated color palette.

Energy Efficiency

Moderate. With optional wrap or foam board, can improve insulation.

Cost & Value

Higher upfront cost; exceptional lifespan and protection make it a top value

Engineered Wood

LP® SmartSide® gives you the warmth and texture of cedar with modern performance. It's lighter than fiber cement, easier to install, and designed to resist impact, termites, and fungal decay.

With over 16 prefinished colors, it brings design flexibility without the high maintenance of natural wood. Its cost efficiency and 25–30 year durability make it a popular choice for homeowners who want natural aesthetics without sacrificing resilience.

Durability

50 year product warranty. Strong against impact, termites, and fungal decay. with a 15 year finish warranty

Maintenance

Low. Finish touch-up kit available.

Aesthetics & Style

Cedar-texture wood look; available in 16 prefinished colors.

Energy Efficiency

Good. Pairs well with foam insulation and has good thermal resistance.

Cost & Value

Lower cost than Hardie; lighter and easier to install.

Woodtone RusticSeries™ Prefinished Rustic Wood Siding

Achieve the authentic look of natural wood with a rich two-tone woodgrain finish designed for long-lasting beauty. At GS Exterior Experts, we offer two premium options for creating this rustic wood appearance on siding products such as James Hardie® fiber cement siding.

Homeowners can choose the Woodtone RusticSeries™ factory-applied finish, known for its consistent two-tone coating that enhances the natural woodgrain texture while providing long-term durability and color stability.

We also offer a custom prefinished option through Rocky Mountain Pre-Stain, a trusted Colorado finishing partner that applies high-quality stains designed to replicate the same rustic woodgrain appearance while allowing greater flexibility in color selection and project customization.

Both finishing options provide the warmth and character of natural wood with the durability of modern siding materials, making them ideal for mountain, rustic, and contemporary Colorado homes.

Durability
Factory-applied two-tone coatings help protect against UV exposure and weathering. Woodtone rustic series 20 year finish warranty

Low Maintenance Advantage
Prefinished to reduce early maintenance cycles and improve long-term color consistency.

Aesthetics & Style
Authentic wood grain, available in a wide range of curated colors.

Design Versatility
Ideal for mountain, modern, rustic, and transitional homes.

Value
enhances curb appeal and long-term resale value.

Stucco & Stone

Stucco provides a smooth, durable finish that complements many Colorado architectural styles, while stone veneer accents add timeless, natural character to entryways, columns, and bases.

Both are fire, insect, and moisture-resistant, requiring minimal upkeep. Stone veneer in particular offers 50+ years of durability and significantly boosts curb appeal.

Together, stucco and stone create exteriors that are both elegant and enduring, perfect for homeowners who want to elevate their home's design.

Durability
Fire-, rot-, pest-resistant; stucco resists cracking, stone is extremely strong.

Maintenance
Low upkeep; stucco may need patching, stone usually needs only washing.

Aesthetics & Style
Timeless look; stucco customizable, stone adds natural warmth.

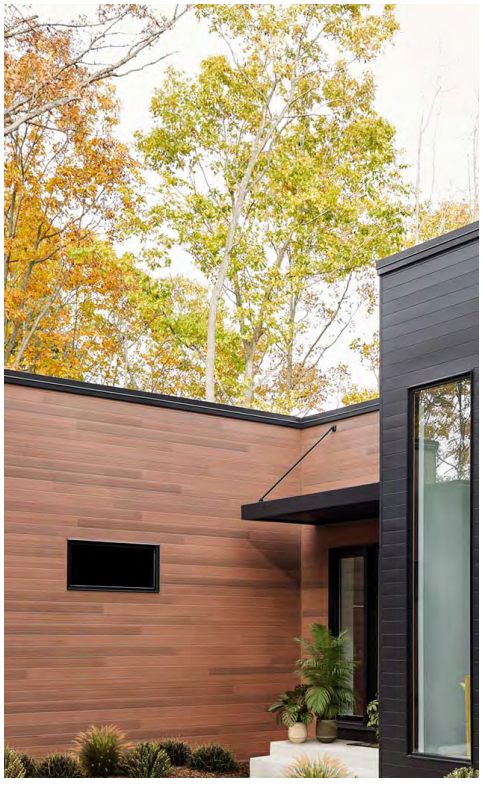
Energy Efficiency
Improves insulation; stucco blocks heat, stone naturally regulates temperature.

Cost & Value
Stucco $12–$19; stone $20–$40+. High longevity and strong resale value.

EDCO® Steel Systems

EDCO is a leader in prefinished steel siding, offering a range of profiles designed to replicate the look of traditional materials while delivering superior performance.

With a baked-on Kynar® finish, EDCO siding maintains its color and resists chalking, fading, and corrosion—even in Colorado's harsh climate. Its interlocking panel system adds strength and weather resistance, creating a tight, durable exterior envelope.



Product Options:

Steel Lap Siding
Clean, horizontal lines that mimic traditional wood siding with a sleek, modern finish.

Steel Board & Batten
Vertical panel design ideal for modern farmhouse or mountain-style homes.

Steel Shake / Slate Profiles
Textured profiles that replicate the look of cedar shake or slate without the maintenance.

Durability
40–70+ years; resistant to fire, moisture, pests, and impact.

Maintenance
Very low upkeep; rinse occasionally. No painting. Check steel scratches for rust.

Aesthetics & Style
Modern profiles and finishes, including matte, metallic, and textured options.

Energy Efficiency
Reflective finishes reduce heat.

Cost & Value
Lower lifetime cost; durability and premium look increase value.

Siding Comparison Guide

Choose the Right Fit for Your Home

Your siding does more than boost curb appeal-it protects your home from Colorado's elements. That's why GS Exterior Experts offers siding options tailored to your goals: fire resistance, energy savings, minimal upkeep, or mountain-inspired aesthetics. Use this guide to compare our most popular siding choices and make an informed decision that fits your budget and lifestyle.

Siding Type	Durability & Lifespan	Maintenance Needs	Aesthetics & Styles	Energy Efficiency	Cost & Value
James Hardie® (Fiber Cement)	30+ years. Non-combustible. Resists fire, hail, pests, and extreme climates.	Low. Occasional rinsing; baked-on color resists fade.	Clean lines with real woodgrain look; curated color palette.	Moderate. With optional wrap or foam board, can improve insulation.	Higher upfront cost; exceptional lifespan and protection make it a top value.
LP® SmartSide® (Engineered Wood)	25–30 years. Strong against impact, termites, and fungal decay.	Low. Finish touch-up kit available.	Cedar-texture wood look; available in 16 prefinished colors.	Good. Pairs well with foam insulation and has good thermal resistance.	Lower cost than Hardie; lighter and easier to install.
Stone Veneer (Accent Only)	50+ years. Fire, insect-, and moisture-resistant.	Very low. Needs little upkeep.	Adds upscale, textured detail to columns, bases, and entryways.	Low impact due to partial coverage, but helps with thermal mass.	Used as an accent; boosts curb appeal and resale value.
Stucco	Fire-, rot-, pest-resistant; stucco resists cracking, stone is extremely strong.	Low upkeep; stucco may need patching, stone usually needs only washing.	Timeless look; stucco customizable, stone adds natural warmth.	Improves insulation; stucco blocks heat, stone naturally regulates temperature.	Stucco $12–$19; stone $20–$40+. High longevity and strong resale value.
Steel	40–70+ years; resistant to fire, moisture, pests, and impact.	Very low upkeep; rinse occasionally. No painting. Check steel scratches for rust.	Modern profiles and finishes, including matte, metallic, and textured options.	Reflective finishes reduce heat.	Lower lifetime cost; durability and premium look increase value.

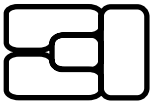
Which Siding Material is Right for You?

Choose **James Hardie®** if fire resistance, longevity, and a sharp, low-maintenance finish are your top priorities. Ideal for Colorado homes in wildfire-prone or high-altitude areas, it's built to endure harsh weather with style.

Choose **LP® SmartSide®** if you want the warmth of wood aesthetics without the high cost or fire rating concerns. Its lighter weight makes for faster installation and excellent impact resistance.

Choose **EverLog®** if you want a true log-cabin look with none of the upkeep. Built from concrete, it's perfect for mountain homes or rustic designs and offers unbeatable durability.

Choose **Metal or Steel Siding** if you prefer a bold, modern or industrial look and want maximum resistance to the elements. A popular choice for outbuildings or low-maintenance exteriors.



Choose **Stone Veneer** when you want to elevate your home's curb appeal with timeless, natural accents-especially around entryways, columns, or bases.

Siding Gallery

Faded or failing siding weakens protection and appearance. Our re-siding projects restore sharp lines, fresh color, and lasting durability that stands up to sun, wind, and hail.

The Gold Standard for Colorado Homes

Bring Comfort, Efficiency and Curb Appeal to Every Room

Protect your home from Colorado's toughest seasons with windows designed to last. At GS Exterior Experts, we help homeowners improve energy efficiency, boost property value, and protect their homes from extreme weather. As a family-owned business since 1999, we back every project with integrity, expert craftsmanship, and our Gold Standard of service. From initial consultation to flawless installation, our window experts guide you every step of the way.

The Gold Standard in Windows

Why Homeowners Choose GS Exterior Experts

Family-Owned & Operated Since 1999
You'll work with a trusted, local team that treats your home like their own.

Certified Installation Experts
We partner with top manufacturers and follow strict installation guidelines to protect your investment.

Dedicated Project Managers
One point of contact from start to finish ensures a smooth, stress-free process.

Lifetime Workmanship Warranty
Enjoy peace of mind knowing we stand behind our work for life.

Our Proven Process

01 Start with an easy, no-obligation estimate.

02 Explore energy-efficient and design-forward window options that meet your style and budget.

03 Our expert crew ensures precision installation and a beautiful, lasting result.

Window Options

Vinyl

Vinyl is one of the most affordable and versatile window options for Colorado homes. With multi-chambered frames and advanced sealing, vinyl delivers strong insulation and energy efficiency. It never requires painting, resists warping and rot, and comes in a wide range of colors and styles. For homeowners seeking value,

Composite

Composite windows combine the strength of wood fibers with the resilience of polymer resins, creating frames that are highly durable, energy-efficient, and resistant to Colorado's changing climate. They deliver the rich look of painted wood but require virtually no upkeep. Offering excellent insulation and long-term stability, composites are a smart choice for homeowners who want modern performance

Fiberglass

Fiberglass windows are engineered for maximum strength and minimal expansion, making them ideal in Colorado's freeze–thaw cycles. They mimic the appearance of natural wood but outperform it in durability, resisting warping, rotting, and swelling. With slim profiles, they allow more glass area and natural light while achieving excellent energy efficiency. Perfect for those who want lasting performance in a sleek design.

Window Options

Bay, Bow & Picture

These expansive designs are made to flood interiors with light and create dramatic views. Bay and bow windows extend outward, adding interior space and architectural interest, while picture windows frame the outdoors like artwork. Each option enhances curb appeal, increases natural light, and can be customized with complementary operable windows for added ventilation. They're perfect for creating statement features in living and dining spaces.

Custom & Specialty Shapes

For homeowners seeking something truly unique, custom and specialty-shaped windows, arches, circles, triangles, and beyond provide a distinctive architectural touch. Crafted to fit non-standard openings, they enhance design flexibility while maintaining energy efficiency. Whether as standalone features or accents paired with standard windows, they let you express your home's personality in a way that stands out.

Window Comparison Guide

Choose the Right Fit for Your Home

Window Type	Durability & Lifespan	Maintenance Needs	Aesthetics & Styles	Energy Efficiency	Cost & Value
Vinyl	20–30 years. Resistant to rot, warping, and corrosion.	Very low. No painting; minimal upkeep.	Wide variety of colors and styles; smooth or textured finishes.	Strong insulation due to multi-chambered frames and sealing.	Affordable upfront; excellent value for durability and performance.
Composite	30+ years. Highly durable; resists expansion, rot, and climate stress.	Very low. Won't peel, chip, or need repainting.	Looks like painted wood with modern finishes.	Excellent thermal resistance; performs well in extreme climates.	Excellent thermal resistance; performs well in extreme climates.
Fiberglass	35+ years. Very strong; resists warping, swelling, or rotting.	Very low. Long-lasting finish requires minimal care.	Sleek, slim profiles with wood-like appearance; maximizes glass area.	Excellent. Minimal expansion/ contraction improves efficiency.	Higher upfront cost; premium performance and longevity.
Wood-Clad	30+ years with proper maintenance. Protected exterior extends lifespan.	Moderate. Interior wood requires periodic staining/painting.	Warm, natural wood interiors with exterior cladding options.	Good insulation; natural wood paired with clad protection.	Higher cost; valued for beauty and customization.

TOP CHOICE FOR COLORADO ROOFING REPLACEMENT SINCE 1999

GS Exterior Experts is the top choice for a Denver roofing contractor.

Our experienced team has been proudly serving locals in the area with high-quality work. This includes helping customers file insurance claims after home damage incidents.

We also specialize in asphalt, tile roofs, metal roofs, and impact-resistant solutions. No matter your needs or preferences we have you covered!

The Gold Standard in Roofing

Why Homeowners Choose GS Exterior Experts

Family-Owned & Operated Since 1999
You'll work with a trusted, local team that treats your home like their own.

Certified Installation Experts
We partner with top manufacturers and follow strict installation guidelines to protect your investment.

Dedicated Project Managers
One point of contact from start to finish ensures a smooth, stress-free process.

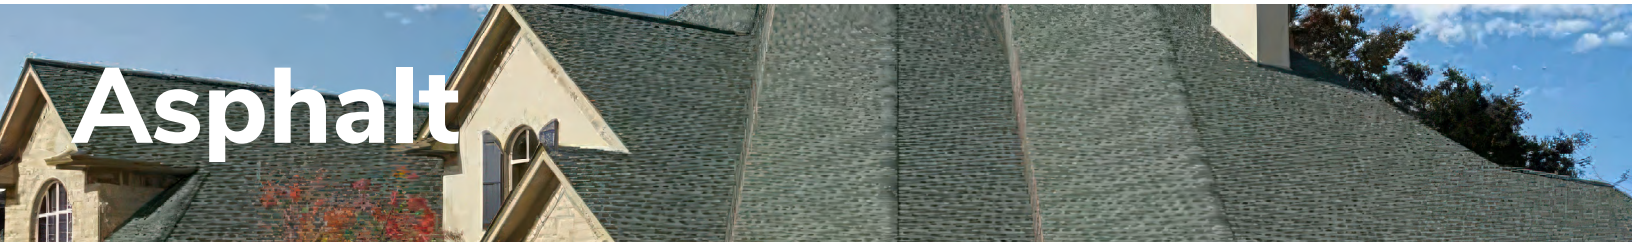
Lifetime Workmanship Warranty
Enjoy peace of mind knowing we stand behind our work for life.

Our Proven Process

01 Start with an easy, no-obligation estimate.

02 Explore energy-efficient and design-forward roofing options that meet your style and budget.

03 Our expert crew ensures precision installation and a beautiful, lasting result.



Asphalt

Asphalt roofing shingles are cost-effective, durable, and easy to maintain.

Some varieties of asphalt shingles are manufactured to resemble tile, wood, cedar shakes, or slate while providing more benefits than other roofing materials. You can choose a flat, uniform look that is created with long, rectangular, asphalt shingles neatly lined edge-to-edge Or, you might prefer the classic look of overlapping asphalt shingles. They might be similar in shape and color, but they create a cool 3D effect with varying shades. And if you're into that natural vibe, there are rough-edged shingles to consider.

Product Options:

Duration Shingles by Owens Corning

They are designed to amp up the contrast and dimension of any roof with a mix of granule colors and shadowing. They create a one-of-a-kind and striking effect that sets them apart from the rest.

GAF ArmorShield™

It's not just about quality materials – they've got style too! Their beauty is unlike any other, thanks to their proprietary shadow bands.

CertainTeed Presidential®

The original luxury shingle series made to look like hand-split cedar shakes in the form of premium roofing asphalt.

Metal & Steel

Maximum durability. Modern performance. Built for Colorado.

Metal and steel roofing systems offer some of the most durable and long-lasting protection available for Colorado homes. Designed to withstand extreme weather conditions—including hail, high winds, heavy snow, and intense UV exposure—these systems deliver unmatched performance with minimal maintenance.

From sleek standing seam panels to stone-coated steel that mimics traditional roofing styles, metal roofing provides both modern aesthetics and long-term reliability. For homeowners seeking a premium, fire-resistant solution, metal and steel roofing are among the best investments you can make.

Product Options:

Standing Seam Metal (Metal sales)

Manufactured by industry leader Metal Sales, standing seam metal roofing features clean vertical lines and concealed fasteners for a sleek, modern look. Engineered for strength and weather resistance, these panels are ideal for shedding snow, resisting high winds, and maintaining long-term performance with minimal upkeep. Available in a wide range of colors, standing seam systems are a top choice for modern and mountain-style homes.

Stone-Coated Steel

Decra Roofing Systems combines the strength of steel with the appearance of traditional roofing materials like shake, tile, or shingles.

Each panel is coated with stone granules to create a textured, dimensional look while maintaining superior durability. Its interlocking system enhances wind resistance and provides excellent protection against hail and harsh weather conditions.

Durability

40–70+ years. Engineered to resist hail, wind, fire, and extreme climates.

Maintenance

Very low. No cracking, warping, or frequent repairs required.

Aesthetics & Style

Choose from sleek modern panels or textured profiles that replicate shake, tile, or shingles.

Energy Efficiency

Excellent. Reflects solar heat and improves energy performance in both summer and winter.

Cost & Value

Higher upfront investment; exceptional lifespan and minimal maintenance deliver strong long-term value.

Synthetic

Premium performance. Timeless design. Built for Colorado. Synthetic roofing offers the look of natural slate or cedar shake with advanced durability engineered for harsh climates. Designed to outperform traditional materials, these systems resist hail, UV exposure, moisture, and temperature extremes—making them an ideal choice for Colorado homes.

Unlike traditional asphalt or natural wood, synthetic roofing products are built from advanced composite materials that eliminate common failure points like cracking, granule loss, and rot.

With minimal maintenance and exceptional longevity, synthetic roofing delivers long-term performance without sacrificing curb appeal. Whether you prefer the bold, clean look of slate or the rustic character of cedar shake, synthetic options provide a lightweight, durable solution that holds up in Colorado's toughest conditions.

Product Options:

F-Wave REVIA Designer Slate

Engineered from a single-piece polymer, F-Wave roofing is designed for maximum durability and performance. It contains no asphalt, no granules, and no layered construction—eliminating many of the common issues found in traditional shingles.

F-Wave offers exceptional resistance to hail, UV exposure, and fire, making it one of the most resilient roofing systems available today.

DaVinci® Roofscapes

DaVinci synthetic roofing delivers the authentic beauty of natural slate and cedar shake with the benefit of modern materials. Each tile is engineered for consistency, durability, and long-term color performance.

Lightweight and highly impact-resistant, DaVinci products are ideal for homeowners seeking a high-end, architectural look without the maintenance requirements of natural materials. Optional Bottom Section (Highly Recommended Add-On)

Why Choose Synthetic Roofing?

- Exceptional hail resistance (ideal for Colorado storms)
- Long lifespan with minimal maintenance
- Lightweight alternative to natural slate or tile
- High-end appearance without cracking, warping, or rot
- Strong fire and UV resistance

Tile

Clay tile roofs are an ideal match for homes with a Spanish or Mediterranean design style. This type of roofing also pairs well with stone or brick siding. It's a suitable roof choice for today's most in-demand architectural styles

Clay tiles can last for as long as 100 years, compared to concrete which typically lasts 50 years. Regardless of the sometimes unpredictable weather in Colorado, tile roofing in Denver will remain durable. Clay tiles are a great environmentally friendly and can be easily recycled once removed. Concrete tiles are also available to imitate shake and slate tiles.

Product Options:

Clay Tile

Clay roof tile represents top-quality roofing, with the highest standard of sustainability and craftsmanship.

Concrete Tile

Concrete roof tile is both beautiful and enduring, making them an effortless choice to complement your lifestyle and increase the value of your home.

Roofing Comparison Guide

Choose the Right Fit for Your Home

Roofing Type	Durability & Lifespan	Maintenance Needs	Aesthetics & Styles	Performance	Cost & Value
Asphalt Shingles (Standard + Class 4 Impact Resistant)	20–30 years (Standard) | 25–35 years (Impact Resistant)	Low. May require repairs after severe hail events.	Wide range of colors and dimensional styles from GAF & Owens Corning.	Good (Standard) | Excellent (Impact Resistant – Class 4 rated for hail)	Most affordable option. Impact-resistant upgrade offers better longevity and possible insurance savings.
Synthetic Roofing (F-Wave / DaVinci)	40–50+ years. Engineered for extreme durability.	Very low. No granule loss, cracking, or warping.	Premium slate or cedar shake appearance without natural material drawbacks.	Excellent. Superior resistance to hail, UV, freeze-thaw, and fire.	Higher upfront investment; one of the best long-term roofing solutions.
Metal & Steel Roofing (Metal Sales / Stone-Coated Steel)	40–70 years. Extremely durable and long-lasting.	Very low. Minimal upkeep required.	Modern standing seam or traditional styles (shake, tile, shingle look).	Excellent. Fire-resistant, snow-shedding, high wind and hail resistance.	Premium cost; long lifespan and energy efficiency deliver strong ROI.
Tile Roofing (Clay / Concrete)	50–100 years. One of the longest-lasting roofing systems.	Moderate. Individual tiles may require replacement if cracked.	High-end Mediterranean or Spanish style appearance.	Good durability; heavy material may not suit all structures or climates.	High upfront cost; best suited for specific architectural styles.

Which Roof Is Right for You?

Choose Asphalt (Impact-Resistant)
if you want affordability with strong protection against Colorado hail.

Choose Synthetic (F-Wave / DaVinci)
if you want the best long-term durability with minimal maintenance.

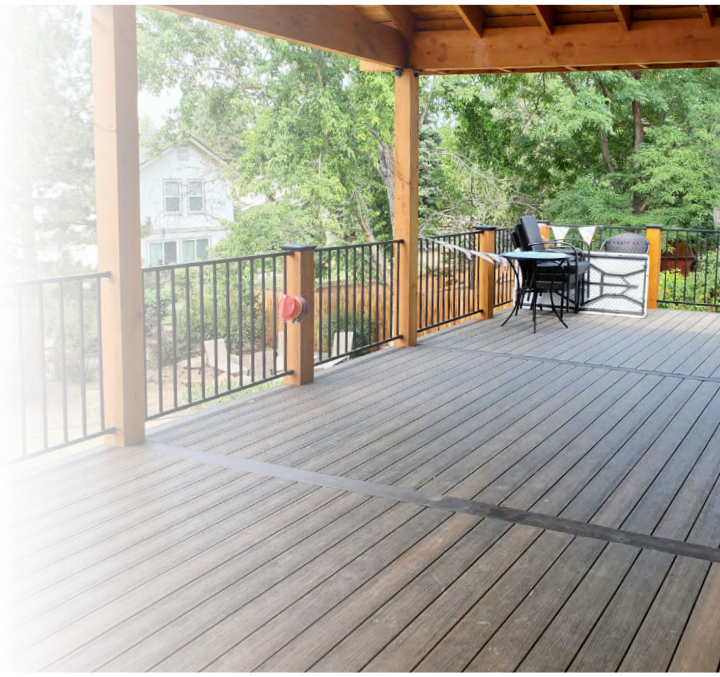
Choose Metal or Steel Roofing
if you want maximum lifespan, fire resistance, and a modern or mountain look.

Choose Tile Roofing
if your home design calls for a high-end, architectural finish.

The Gold Standard for Outdoor Living

Create the Perfect Outdoor Space with Colorado's Decking Experts

Whether you're replacing an aging deck or building a brand-new outdoor oasis, GS Exterior Experts brings craftsmanship, design expertise, and unmatched service to every project. Since 1999, our family-owned team has helped homeowners across Colorado elevate their backyards with beautiful, long-lasting decks built to withstand the elements. From planning and permits to finishing touches, we deliver the Gold Standard of care at every step.



The Gold Standard in Decks

Why Homeowners Choose GS Exterior Experts

Family-Owned & Operated Since 1999
Work with a dedicated team that treats your home like their own.

TimberTech Platinum Certified Installer
We're trained and trusted by TimberTech to deliver high-performance, low-maintenance composite decks.

Custom Design & Engineering Support
Our team helps you visualize the layout, flow, and features that suit your lifestyle.

Lifetime Workmanship Warranty
Your new deck is backed by our Gold Standard commitment-we stand behind every project for life.

Our Proven Process

01 Start with an easy, no-obligation estimate.

02 Review layout and product options designed around your space, style, and outdoor needs.

03 Our professional crew builds a beautiful, lasting deck you'll enjoy for years to come.

Decking Options

TimberTech offers a revolutionary alternative to traditional wood decking, delivering the look of natural wood without the constant upkeep.

With fade- and stain-resistant surfaces, TimberTech decks maintain their beauty year after year while standing up to Colorado's sun, snow, and hail. As a Platinum Certified Installer, GS Exterior Experts provides expert installation and design support, ensuring your deck is as durable as it is stunning. Low maintenance, long lifespan, and customizable design options make TimberTech a favorite for homeowners who want to maximize enjoyment and minimize upkeep.

Trex is a trusted leader in composite decking, known for superior durability and easy care compared to wood.

Engineered to resist fading, staining, and mold, Trex boards offer lasting performance without the need for sanding, painting, or sealing. With a wide range of colors and finishes, Trex makes it simple to match your outdoor style while enjoying the benefits of a low-maintenance deck. Installed by GS Exterior Experts and protected by our Gold Standard lifetime workmanship warranty, Trex provides peace of mind for homeowners looking for a dependable, stylish, and eco-friendly outdoor solution.

Deck Options

Deck Comparison Guide

Choose the Right Fit for Your Home

Decking Type	Durability & Lifespan	Maintenance Needs	Aesthetics & Styles	Performance	Cost & Value
TimberTech® PVC Decking (Class A Fire Resistance)	50+ years. Made from advanced cellular PVC. Will not rot, warp, crack, splinter, or absorb moisture. Fire-resistant construction — TimberTech is currently the only decking manufacturer offering a fire-resistant decking product, making it ideal for Colorado mountain, foothill, and wildfire-prone areas.	Virtually maintenance-free. No staining, sealing, sanding, or painting required. Occasional soap-and-water cleaning only.	Premium, high-end appearance with rich wood-grain textures. Available in modern, coastal, and natural wood tones with matching fascia and railing systems.	Exceptional. Highly resistant to moisture, snow, ice, UV exposure, and freeze-thaw cycles. Cooler underfoot than many composites and extremely stable in Colorado's climate extremes.	Higher upfront investment, but lowest lifetime cost due to unmatched durability, fire resistance, and zero maintenance.
TimberTech® Composite Decking	30–40 years. Engineered composite core with a protective polymer cap. Resists fading, staining, mold, and moisture far better than traditional wood.	Low-maintenance. No painting, staining, or sealing required. Simple periodic cleaning keeps it looking new.	Authentic wood-look boards with multiple color collections and realistic grain patterns. Ideal for homeowners who want a natural look without wood upkeep.	Excellent. Designed to withstand Colorado sun exposure, snow loads, and temperature swings. Strong, stable, and splinter-free.	Mid-to-upper range cost. Strong long-term value with significantly reduced maintenance compared to wood.
Trex® (Engineered Wood)	25–30 years. Built to resist fading, staining, and mold.	Very low. Just occasional cleaning; no refinishing needed.	Wide range of colors and finishes for versatile design.	Excellent. Durable against moisture and temperature swings.	Mid-range cost; strong balance of style, performance, and affordability.
Traditional Wood	10–20 years with proper care; susceptible to rot, warping, pests.	High. Requires regular staining, sealing, and repairs.	Natural grain and classic appeal; customizable with stains.	Fair. Vulnerable to Colorado's sun, snow, and moisture without upkeep.	Lower upfront, but higher lifetime cost due to maintenance needs.

Fire-Resistant Exterior Solution

Colorado's growing wildfire risk has changed how homes are built and protected—especially in Wildland-Urban Interface (WUI) zones. Today, creating a fire-resilient home requires more than just one product—it takes a fully integrated exterior system designed to reduce ignition risk and withstand extreme conditions.

ROOFING SYSTEMS

Non-combustible and impact-resistant roofing materials are your home's first line of defense against embers and radiant heat.

Synthetic (F-Wave)
Class A fire-rated, no asphalt or granules.

Metal (standing seam)
Non-combustible steel panels.

Stone-Coated Steel (Decra)
Interlocking panels with high durabilitydesigned to resist ignition and perform in wildfire-prone areas.

DECKING & EXTERIOR STRUCTURES

Decks and outdoor spaces can be ignition points if not properly built with fire-resistant materials.

TimberTech® PVC system
Fire-resistant, low-maintenance composite.

Aluminum & Metal railing systems
Non-combustible and durable Enclosed or protected framing systems to reduce ember exposure.

Fire-Resistant Exterior Solution

Colorado's growing wildfire risk has changed how homes are built and protected—especially in Wildland-Urban Interface (WUI) zones. Today, creating a fire-resilient home requires more than just one product—it takes a fully integrated exterior system designed to reduce ignition risk and withstand extreme conditions.

SIDING SYSTEMS

Your siding plays a critical role in preventing flame spread and protecting the structure.

Fiber Cement

(James Hardie® & Everlog)
Non-combustible and highly durable.

Steel (EDCO®)

Fire-resistant, impact-resistant, and low maintenance.

Stucco Systems

Naturally fire-resistant exterior barrier.

Coronado Stone Veneer

Non-combustible accent or full wall system Built to withstand heat, embers, and extreme weather.

WINDOW SYSTEMS

Windows are one of the most vulnerable areas during a fire—upgrading them improves protection and efficiency.

Fiberglass

Strong frames with excellent heat resistance.

Composite

Durable and stable in extreme conditions.

Dual or Triple-Pane Glass

Improved thermal protection Designed to reduce heat transfer and increase structural integrity.

Full Exterior Solutions

WHY HOMEOWNERS CHOOSE A FULL EXTERIOR SYSTEM

Bundling exterior improvements often reduces overall costs, shortens timelines, and ensures every component works together as a complete system.

- Better protection against Colorado's weather
- Improved energy efficiency throughout the home
- Consistent design and curb appeal
- Fewer long-term repairs and maintenance issues
- One streamlined project instead of multiple contractors
- One Project. Greater Value.

Roofing

Protect your home from hail, wind, and extreme weather with high-performance roofing systems including asphalt, synthetic, metal, and impact-resistant options.

Siding

Upgrade curb appeal and protection with fiber cement, engineered wood, steel, stucco, or stone systems designed for Colorado conditions.

Windows

Improve energy efficiency, comfort, and natural light with modern vinyl, composite, and fiberglass window solutions.

Decking & Outdoor Living

Create durable, low-maintenance outdoor spaces with composite decking and modern railing systems built to last.

Stucco & Stone

Add long-lasting protection and architectural detail with fire-resistant stucco systems and stone veneer accents.

THE GS ADVANTAGE

- One point of contact from start to finish
- Coordinated installation across all trades
- Manufacturer-compliant installation for every product
- Lifetime workmanship warranty
- Trusted by Colorado homeowners since 1999

"From roof to foundation, GS Exterior Experts delivers complete exterior systems built to protect, perform, and last in Colorado's toughest conditions."

Our Process

The Gold Standard of Cares

At GS Exterior Experts, we make exterior remodeling simple, transparent, and stress-free. From the first conversation to the final walkthrough, every step is handled with professionalism, craftsmanship, and a commitment to your satisfaction.

01 Start with an Easy Estimate

We begin with a free, no-obligation consultation. Our team listens to your needs, evaluates your home, and provides clear, upfront pricing so you can make confident decisions.

02 Explore Options & Design

Work with a dedicated Project Manager to review layouts, product lines, colors, and finishes tailored to your space, style, and budget. Whether it's siding, windows, or a deck, we guide you through the best choices for Colorado's climate and your home's character.

03 Precision Installation

Our certified crews bring decades of experience and attention to detail to every project. From permitting and prep to construction and finishing touches, we deliver workmanship you can count on for life.

04 Final Walkthrough & Warranty

Before we call a project complete, we walk through every detail with you to ensure it meets our high standards and yours. With our Gold Standard Lifetime Workmanship Warranty, you'll have peace of mind long after installation is done.

WARRANTY

EXTERIOR EXPERTS

WORKMANSHIP WARRANTY CERTIFICATE

GS Exterior Experts warrants to the original purchaser, and one-time transferable to a subsequent owner, all work performed as outlined in the signed service agreement. GS Exterior Experts guarantees that all work will meet trade standards of good workmanship and that all products will be installed according to the manufacturer's best practices and specifications. GS Exterior Experts will make every effort to blend existing textures, colors, and planes, but exact duplication is not guaranteed. Materials of excellent quality will be selected, and all manufacturer warranties will be maintained and provided to the customer upon project completion.

This workmanship warranty is included with the service agreement. It becomes effective only upon the Homeowner's signature of the project completion form, which will be emailed once the scope of work outlined in the agreement is complete. **A signed completion form along with full payment, including all approved change orders, is required to activate this warranty.**

Should a defect in workmanship arise after project completion, GS Exterior Experts will repair or correct the issue at no cost to the customer, provided the issue falls within the scope of work defined in the original agreement. This warranty applies only to areas where GS Exterior Experts has entirely replaced existing products. It does not apply to work performed by other contractors, nor does it cover partial repairs, normal wear and tear, or damage resulting from hail, wind, sun, accidents, misuse, or acts of God, whether or not such damage is subject to an insurance claim.

Defects in the materials themselves are not covered under this workmanship warranty and fall under the original manufacturer's warranty. Caulking (including fading, cracking, or shrinking) and paint touch-up on James Hardie Color Plus products are specifically excluded from this warranty.

This warranty is a **lifetime workmanship warranty**, effective from the date the completion form is signed. This warranty is **transferable one time** to a new property owner. To remain valid, notification of transfer must be submitted in writing to GS Exterior Experts within 30 days of the property's transfer.

Thank you for your business.

OSI Caulking

GS Exterior Experts does not provide any warranty for OSI caulking. While this product is used in our installations due to its high performance, durability, and flexibility, GS Exterior Experts does not assume responsibility for its long-term performance or any issues related to its application, durability, or failure. Any concerns regarding OSI caulking should be addressed directly to the manufacturer, as per their product-specific warranty policies.
